

I support media diversity

Citizen Kane is considered by many to be the greatest film of all time, yet we live in a time period where we are in a state of unprecedented media control. Marshall McLuhan predicted that we would one day have an apparatus to communicate globally, but the media monopoly that has been allowed to take place makes it so it isn't really connecting us globally, it is making it so fewer and fewer people are being given a really strong soapbox and advertising vehicle. This media consolidation that is being allowed to take place is very Orwellian and VERY un-American. It must be stopped. Please help us to take back the First Amendment and the principles that America was founded upon by supporting REAL freedom of the press. Thank you.
